

Stainless Steel Flexible Tubing

Falcon Stainless "Mega-flow SUPER Water-flex"

Code Compliant Flexible Connectors

Falcon stainless steel "Mega-flow SUPER Water-flex" flexible tubing provides increased flow, flexibility and strength and resists kinking, crimping, cracking, corroding and pinholing while meeting code requirements.

Unlike traditional braided stainless steel tubing, the "Mega-flow SUPER Water-flex" flexible tubing is full flow tubing with flow rates up to 134% more than equivalent braided hose sizes.

There are no taste and odour problems that are associated with the rubber lined braided hoses.

Falcon sizes range from ½" (12.7mm) to 2" (50mm).

"Mega-flow SUPER Water-flex" flexible tubing connectors are approved to ATS 5200.489 in accordance with AS/NZS 3500 with WaterMark.

Falcon Stainless Inc. is the recognized brand leader for flexible water connections.
