**aquafresh**

**quality shower filters**  
**chlorine reduced, refreshing showers**

Chlorine is universally used to disinfect water but it is generally regarded as not safe for drinking, showering or bathing. Today, millions of people worldwide filter their drinking water but comparatively few filter their shower water even though research studies have reported and warned of the potential damaging effects of exposure to chlorine evaporated out of shower water.

If chlorine is so bad, why isn't it banned you ask. A fair question, but one we can't answer. That's one for the politicians. In the mean time, do some simple research. Enter the words 'chlorine' and 'shower' into Google and see what comes up. Read the reports. We are sure you'll agree that those pleasurable long, hot showers could be doing you a lot of harm.

Public concern is growing and one day something will be done but in the short term, the simple, economical answer is to install a shower filter that will reduce or remove the harmful chlorine as well as dirt, rust, sediment and other water borne contaminants.

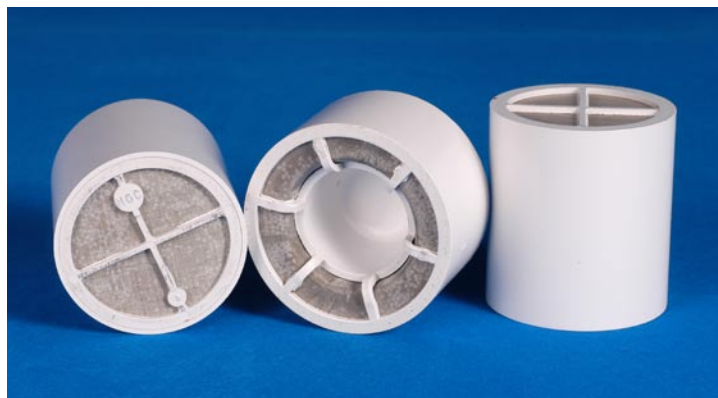

Consider this range of shower filter options from Aquafresh.

## Classic High Output Shower Filter

The high output replaceable cartridge is easily reversed to provide balanced filtration and back flushing and gives an excellent service life of about 12 months. Features special high performance KDF and Chlorgon™ filtration media.

The shower filter unit is available in White, Chrome and Gold finish as options to suit almost every bathroom décor. Available with or without massaging action shower rose.

Size: 89mm diameter x 108mm length

**CHLORGON™** is a filtration medium that converts chlorine into a harmless chloride.

KDF® Process Media are high-purity, granulated copper and zinc-based alloy formulations that safely reduce or remove chlorine, iron, hydrogen sulfide, heavy metals, and bacteria from water. The technology also dramatically extends system life, lowers total cost and decreases maintenance.

All shower filters in this brochure feature one or both of these filtration media.

## Slimline Shower Filter

This compact replaceable cartridge provides a service life of about 6 months of maximum efficiency filtration.

It can be easily reversed to provide balanced filtration and back flushing. Features special high performance KDF and Chlorgon™ filtration media.

Available in White only with or without massaging action shower rose.

Size: 89mm diameter x 76mm length

## High Capacity Shower Filter

Disposable shower filter provides a service life of about 18 months. Uses KDF media to provide excellent filtration.

Can be reverse flushed with bush provided to maintain high levels of filtration throughout its life.

The unit is available in White only.

Size: 70mm diameter x 120mm length

## Shower Hose Filter

The shower hose filter connects between the water inlet and the shower hose and has a unique ball swivel connection.

The filter provides a service life of about 6 months and uses the special high performance KDF and Chlorgon™ filtration media.

The replaceable cartridge can be easily reversed to provide balanced filtration and back flushing for excellent long life.

The unit is available in Chrome finish only.

Size: 40mm diameter x 200mm length
