

Water Filters - Water Purifiers & Shower Filters

WATER FILTERS TO SUIT TODAY'S KITCHENS

An Alpine under sink water purifier is a convenient means of providing clean, fresh tasting water free of contaminants at a fraction of the cost of bottled water.

Hidden away plumbed conveniently under the sink, the range of Alpine water filters is ideal for home and/or office situations.

All systems are supplied with installation kits which include connections to your under sink pipework, pressure limiting, back flow prevention valving, shut off valve, high pressure food grade tubing and a stylish chrome faucet.

The benefits of underbench purifiers

It reduces:

Sediment, dirt, rust and silt to improve water clarity

Offensive odours from built up organic matter in water pipes. Offensive tastes from bacteria killing chlorine

VOC - Volatile Organic Compounds

Prevents against:

Cryptosporidium, Giardia Cyst and selected volatile organic compound down to 0.5 micron (nominal)

Bacteria

All under sink systems include a chrome ceramic seat quarter turn designer faucet

Alpine TJ Series Single Underbench Filter

Type	Model	Single Under bench
Part Number		Alpine SUTJ Series
Micron		SUTJ3-K2A-DM
Rating		0.5 micron (nominal)
Flow Rate		4 litres/minute (optimal)
Temperature		Max. 38 degrees C
Pressure		862 kPa (125 psi)
Dimensions		275 mm high x 95 mm wide x 93 mm deep

Alpine Reverse Osmosis Undersink Water Purifier

Type	Reverse Osmosis
Model	Undersink Alpine TJ Series
Part Number	TJRO13T12-K3A-DM
Micron Rating	5 angstrom
Flow Rate	1.5 litres per minute (optimal) from Accumulator tank
Temperature	38 degrees C max.
Pressure	862 kPa (125 psi)
Dimensions	290 mm high x 390 mm wide x 93 mm deep

Introducing the Alpine AQ905 Full Flow System

A high performance, high flowing filtered water for your kitchen mixer tap. Fits in line with your cold water mains supply to your kitchen mixer faucet. Filtered water cartridge Watermarked certified to reduce chlorine, bad tastes and odours, sediment and other chemicals.

What's in the kit

Bracketed filter head—½" BSP male inlet and outlet

High Flow Filter Cartridge Watermark Certified AS3497 Lic. 23066

Two 450mm x ½" BSP braided hoses – 15 year warranty – Watermark certified WMKA21431

Ceramic disc chrome stop valve with swivel nut – Watermark certified

Chrome brass pressure limiting anti hammer back flow prevention valve –
Watermark certified to AS1357.2, AS2845.1, Lic 23059

Features

Quick and easy installation – fits in line with existing braided hoses

Ideal for stone benchtops or where a separate dedicated faucet is not ideal

System hidden away under the kitchen bench

Quick and easy cartridge replacement with up to 12 months usage

Specifications

Flow rate: 8 litres per minute

Max water temperature: 38 deg C

Filtration Grade: Fine

Micron Rating: 5

Minimum Pressure: 172 kPa (25psi)

Maximum Pressure: 860 kPa (125 psi)

Warranty (excl cartridge): 3 years

Dimensions: 450mm (L) x 110mm (W)

The Alpine "Grande" TriFlow Polished Chrome Designer Mixer Faucet

A chrome plated finish brass this mixer tap/faucet and has an ultra modern look in any kitchen.

The Alpine "Grande" faucet features a pin levered Hot and Cold mixer operation on the top with an easy to use pin lever control under the spout for pure water flow. This faucet eliminates the need for separate filtered water faucet.

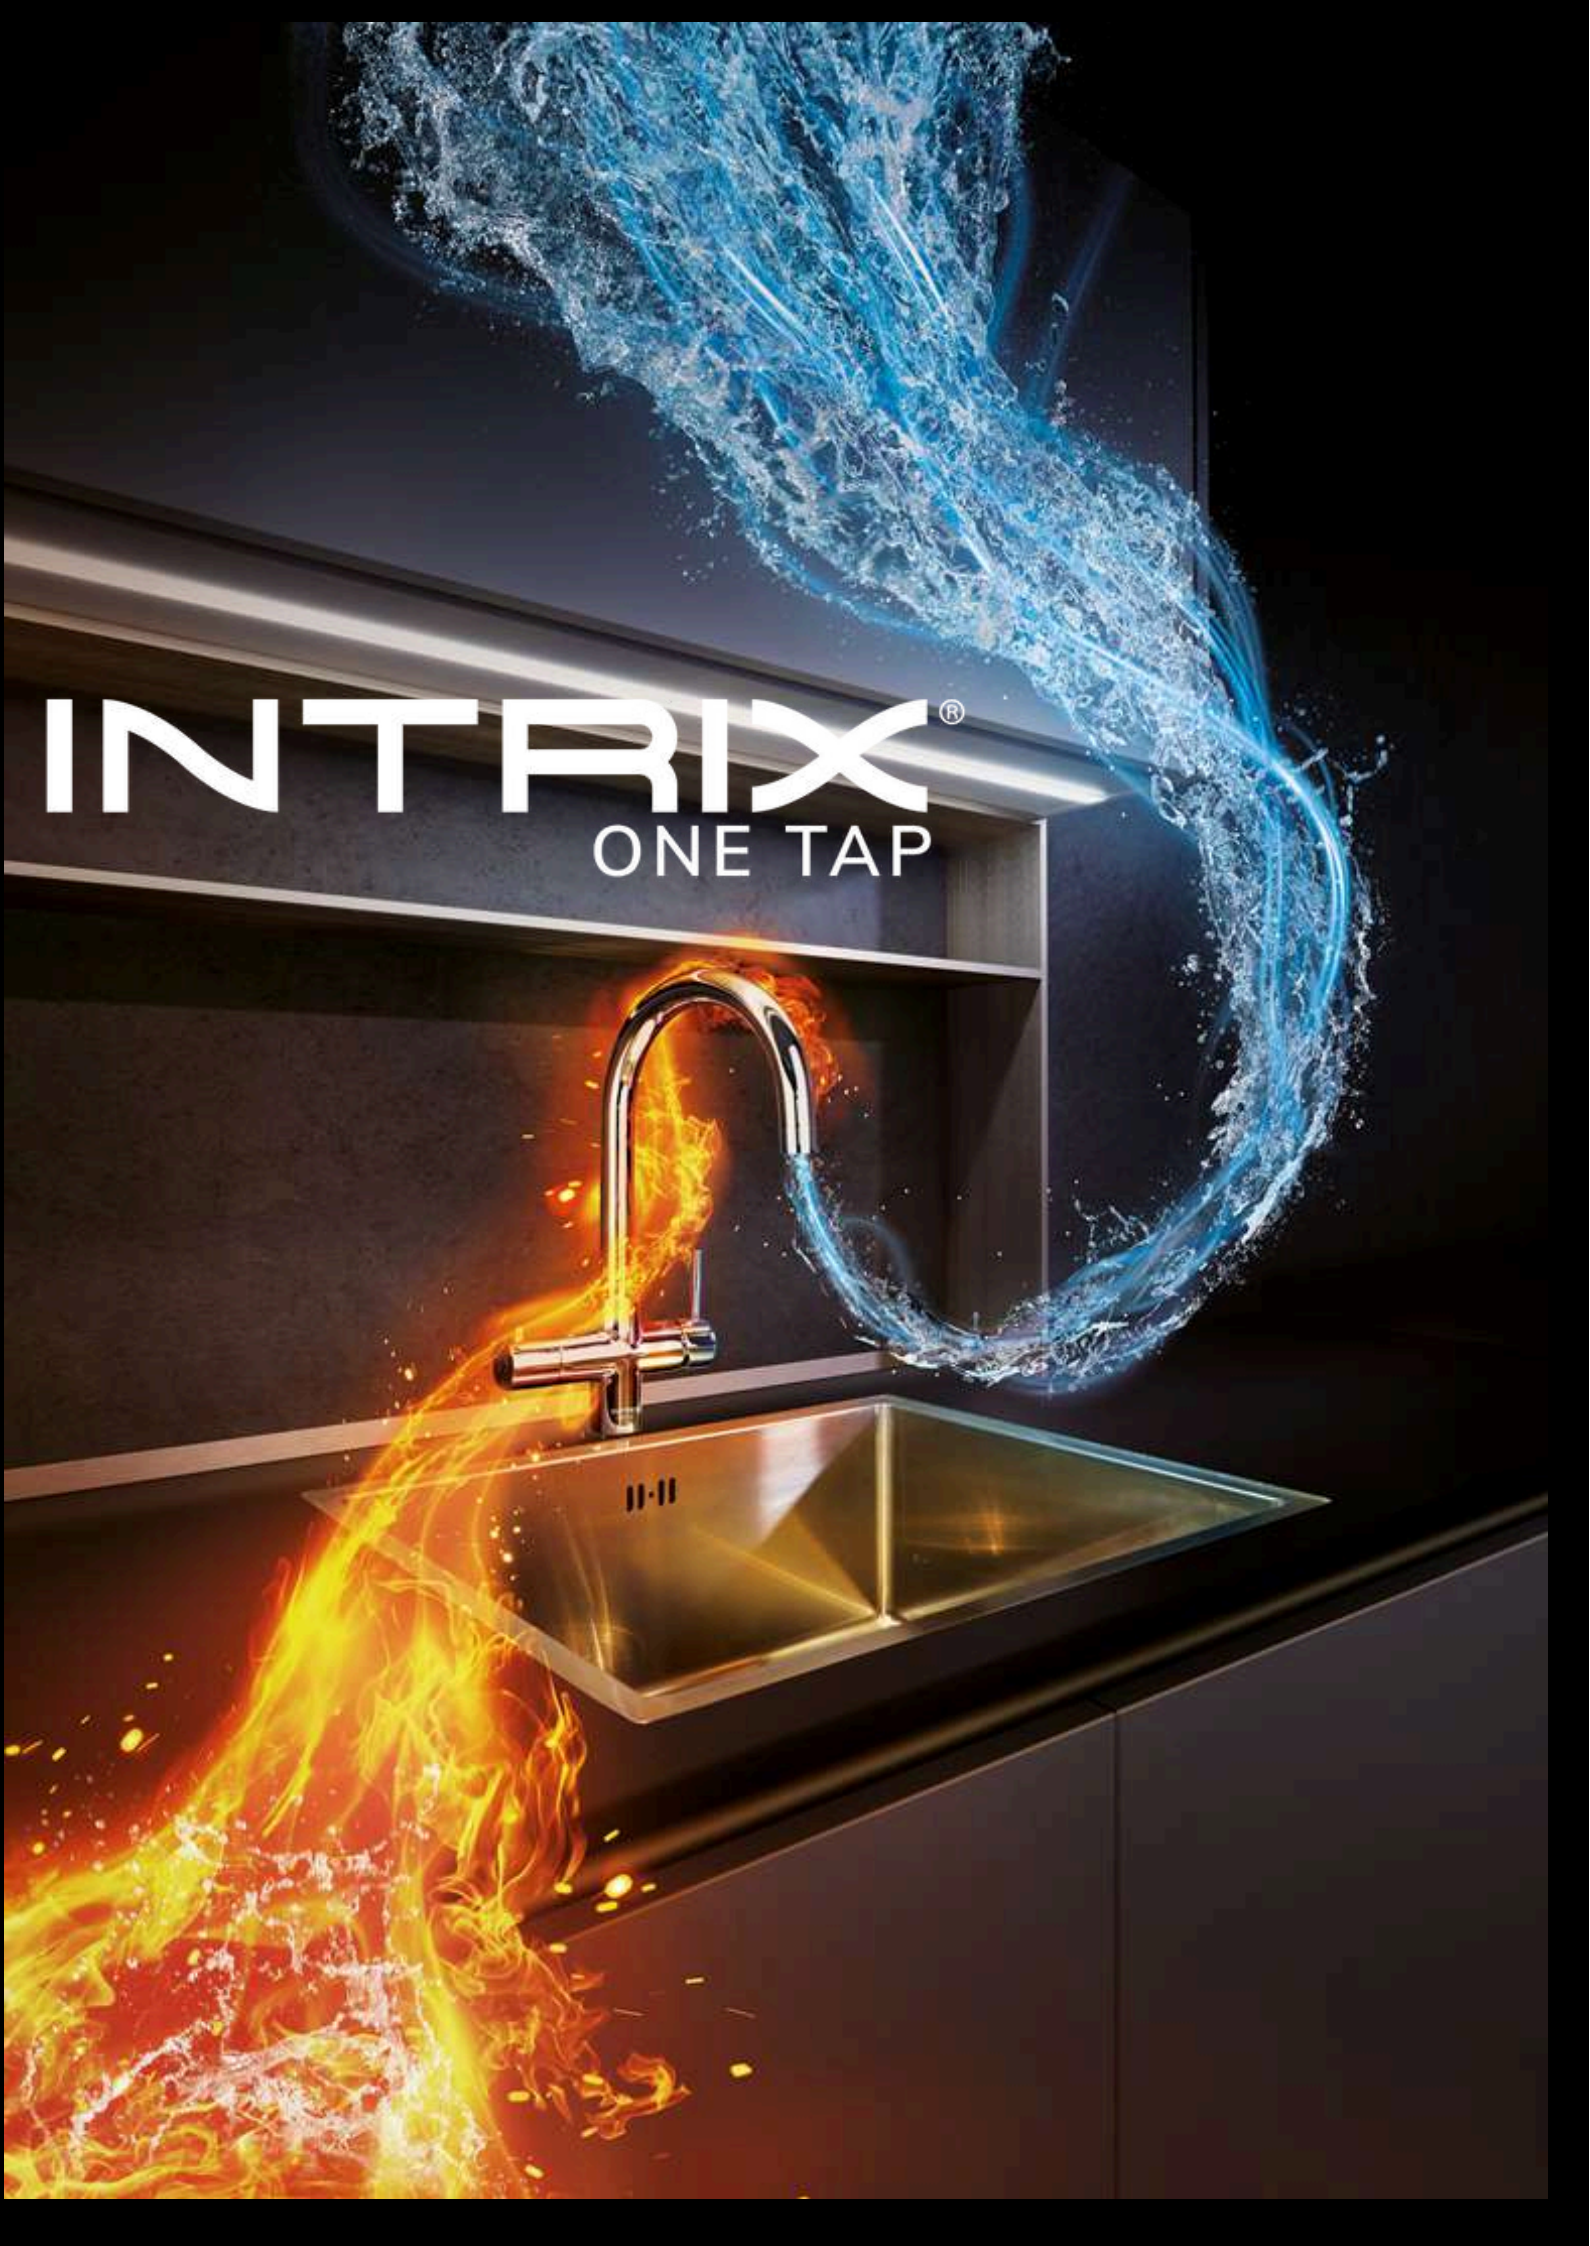

It is the perfect faucet for **Reverse Osmosis, Single, Twin or Triple Undersink Water Filtration Systems**. The Alpine "Grande" faucet can easily replace an existing mixer faucet to reduce the clutter on your kitchen bench.

This product is Watermark
Certified to AS/NZS 3718 Cert. 23033

SIMPLICITY MEETS FUNCTIONALITY

**QUALITY SHOWER FILTERS
FOR CHLORINE REDUCED,
REFRESHING SHOWERS**

Chlorine is universally used to disinfect water but it is generally regarded as not safe for drinking, showering or bathing. Today, millions of people worldwide filter their drinking water but comparatively few filter their shower water even though research studies have reported and warned of the potential damaging effects of exposure to chlorine evaporated out of shower water.

Public concern is growing and one day something will be done but in the short term, the simple, economical answer is to install a shower filter that will reduce or remove the harmful chlorine as well as dirt, rust, sediment and other water borne contaminants.

Universal shower hose filter

(hose and showerhead not included)

The shower hose filter connects between the water inlet and the shower hose and has a unique ball swivel connection.

The filter provides a service life of about 6 months and uses the special high performance KDF and Chlorgon TM filtration media.

The replaceable cartridge can be easily reversed to provide balanced filtration and back flushing for excellent long life.

The unit is available in Chrome finish only.

Size: 40mm diameter x 200mm length

System Benefits:

Reduces chlorine, dirt and odours from your shower water. Reduces problems such as dry skin and hair, eye and skin irritations, scum on shower screens caused by chlorine in your shower water.

This high performance shower filter provides a clean and healthy shower for the entire family.

Cartridge life approximately 4 to 6 months.

GST

Shower Filter SFHOWH

(shower rose not included)

The high output replaceable cartridge is easily reversed to provide balanced filtration and back flushing and gives an excellent service life of about 12 months. Features special high performance KDF and Chlorgon TM filtration media.

The shower filter unit is available in White, Chrome and Gold finish as options to suit almost every bathroom décor. Available with or without massaging action shower rose.

Size: 89mm diameter x 108mm length

System Benefits:

Reduces chlorine, dirt and odours from your shower water.

Reduces problems such as dry skin and hair, eye and skin irritations, scum on shower screens caused by chlorine in your shower water.

This high performance shower filter provides a clean and healthy shower for the entire family.

Cartridge life approximately 12 months.

ALPINE CARTRIDGES

Aqua Fresh supplies Alpine labelled cartridge filtration that is used extensively to remove sediment, tastes and odours, colour, chemicals, particulates for drinking, process and medical quality water.

The Alpine range of premium cartridges covers a wide variety of applications and properties -the common types of which are listed on the following pages.

With over 28 years of service in the water filtration industry the technical team at Aqua Fresh can help you source the most efficient cartridge for your filtration requirements.

Alpine Polyspun Sediment Cartridges

Manufactured from Spun Polypropylene media

Spun melt manufacture – no centre core lining to restrict flow

- Spun and melted to provide graded depth
- Suitable for town mains water supply
- Compatible with most liquids
- High sediment reduction capability
- Low pressure drop
- Zero chemical residue
- Lower flow restriction

Highly efficient in removing from water the following:

- Dirt
- Rust
- Silt
- Scale particles
- Sand
- Algae
- Organic materials

Slimline 2.5" diameter polyspun cartridges

Part Number	Length	Micron	Flow L/Min

Alpine String Wound Sediment Cartridges

Manufactured from a durable Polypropylene cord wound in a precise pattern around a rigid polypropylene core

- Suitable for town mains or rainwater water supply & a wide range of industrial liquids
- High sediment reduction capability
- Low pressure drop
- Zero chemical residue
- Low flow restriction
- Temperatures up to 165 F (73.90 C)

Highly efficient in removing from water the following:

- Dirt
- Rust
- Silt
- Scale particles
- Sand
- Algae
- Organic materials

Alpine Pleated Sediment Cartridges

Polypropylene core, polypropylene/polyester media Cartridges do not contain cellulose fibre – therefore resistant to rot and mildew

Highly efficient in removing from water the following:

- Dirt
- Rust
- Silt
- Scale particles
- Sand
- Algae

- Washable
- Suitable for rainwater supply
- Large surface area
- High sediment reduction capability
- Minimum pressure drop
- Suitable for low pressure applications
- Lower flow restriction

Alpine Carbon Cartridges

For reduction of chlorine, bad tastes and odours, colour, cysts, some Volatile Organic Compounds, pesticides, herbicides

Carbon Block Cartridges

- Effectively reduce unwanted taste, odour & chlorine from drinking water.
- Specific cartridges reduce cysts (Giardia & Cryptosporidium) and lead.

Granular Activated Carbon Cartridges

- Low pressure drop Effectively reduce
- unwanted taste, odour & chlorine from drinking water.
- Reduction of colour due to tannins
